	Total	660.2 km²

2. Security Export Control by Universities

Characteristics of Security Export Control by Universities NOVERSITY 7

- Mainly transfer of technologies with little export of goods Export of goods is main concern for business.
- Transfer of technologies in wide range of research areas Includes not only computers (WA category4) and network devices (category5) but also lasers (category6), rockets, and satellites (MTCR and WA category9); nuclear reactor and associated technology (NSG); and viruses (AG).
- Short history in comparison with business
 For Business: Practice in place for big business since Toshiba-Kongsberg (CoCom) scandal of 1987.
 For Universities: Initiated by enforcement of Security Export Control regulations in 2010
- Different attitudes toward technology
 For Business: to be concealed as the source of profit
 For Universities: to be open as much as possible.

Despite of tough task, not enough manpower to address the issue in reality!

 Administrative staff are organizational infrastructure

Administrative staff take the core part of risk management

Faculty are most proficient in the relevant technology

Specialist in the relevant field

 Essential for both parties to function in collaboration

3. Security Export Control in Hokkaido University

Hokkaido University Security Export Control Structurence

Head of Security Export Control (President)

General Manager of Security Export Control (Director appointed by President)

University Manager of Security Export Control

Security Export Control Committee

Chairman = University Manager, Security Export Control

> Secondary Examination

Office

Committee Members • Several number of staff members from Center for Innovation and Business Promotion • Deputy head of International Department (to be appointed by President) • Head of Research Promotion Department • Other person(s) deemed necessary by Committee

Examination Structure] Faculty Manager of Security Export Detailed structure of primary Control examination to be determined by the Primary Examination relevant faculty (faculties) including (Head of Faculty, etc.) appointing key faculty members (export control adviser), examiner working group, or establishing Faculty, etc. [Organization for Examination] committee (possibly by multiple faculties), etc. Key faculty members (export control adviser), etc., examiner working group, or establishment of committee (discretionary).

Applicant (Faculty, etc.)

 Faculty Development (FD) is conducted for faculty members belonging to sensitive faculties such as Graduate School of Engineering, etc.

List control and Catch-all (CA) rules

How to understand Combined Matrix Tables

Relationship between the End Users List and highly concerned goods.

- As for sensitive cases such as export of controlled goods, face-to-face meetings are conducted directly at the office of the faculty. MOST IMPORTANT AND EFFECTIVE!
- Checking and correction of reporting from faculties.
- Application for Individual Validated License and management of White License.
- University-wide audit

Identify issues by university-wide audit and implement **PDCA** cycle. Presentation on amendments to law and regulations as well.

4. Challenging Activities

Export Control Day for Academia

Annual event for universities across the nation, concerning security trade control, originated in 2013

輸出管理DAY for ACADEMIA実行委員会 主催

HOKKAIDO

RSITY 13

- Originated in March, 2013 inspired by
- the movement of BAFA (Germany)
- I am the chairman of the event
- Voluntary organization for annual event
- Scheduled to be held at Sophia University 6-101
- the same hall the Pope Francis lectured last November
- 8th event scheduled on March 6th 2020 Theme of 8th event: ITT* for ACADEMIA Supported by METI(Ministry of Economy, Trade and Industry), MEXT, MOFA(Ministry of Foreign Affairs), MOJ(Ministry of Justice), etc. Also, guest speaker from University of Pennsylvania (Ms. Elizabeth Peloso) *Intangible technology transfer

Video transfer instead of get-together meeting during this September to November because of the new Corona Virus

Hokkaido Network

- Regional initiative to promote security trade control for academia
- There are several initiatives in Japan
- Hokkaido area is unique in inclusion of technical colleges

Originated in July, 2019 Focusing on Hokkaido Area Hokkaido University took the first head of the network

Events to be held twice a year

Voluntary initiative

11 Members (as of February, 2020):

- 7 National Universities
- 1 Private University
- 1 Public University
- 2 Technical Colleges

Strongly supported by METI and its Hokkaido Bureau for the introduction of Hokkaido Network

HOKKAIDO

- METI introduced the project to promote voluntary export control for universities across the nation in 2017.
- Focusing on the universities dealing with controlled technologies or goods w/o ICP
- Constituting around 20 advisors w/expertise
- As of April 2020, All national universities (86 universities) have established ICP (17 universities increase compared with 2019)
- So far, I was dispatched to 5 universities as an advisor
 4 universities: ICP already done and effective now
 1 university : ICP to be effective soon

For contribution to international society HOKKAIDO 16

Hokkaido University help amend Japanese regulations for international contribution

(Before amendment) Avian influenza virus (After amendment) Highly pathogenic avian influenza virus

Universities need to contribute to international society while executing an appropriate security export control.

Every year, many requests come to Hokkaido University to provide various infectious virus from international organizations such as WHO.

So far, it took time even for the export of weakly pathogenic avian influenza virus because of the regulation and we missed the timing.

After the amendment, weakly pathogenic avian influenza viruses can be promptly provided only after on-campus checking procedures, and thus enable us to contribute to international society.
